Vertical Mounting Bar Extensions Instruction Manual

How to Attach The Vertical Mounting Bar Extensions

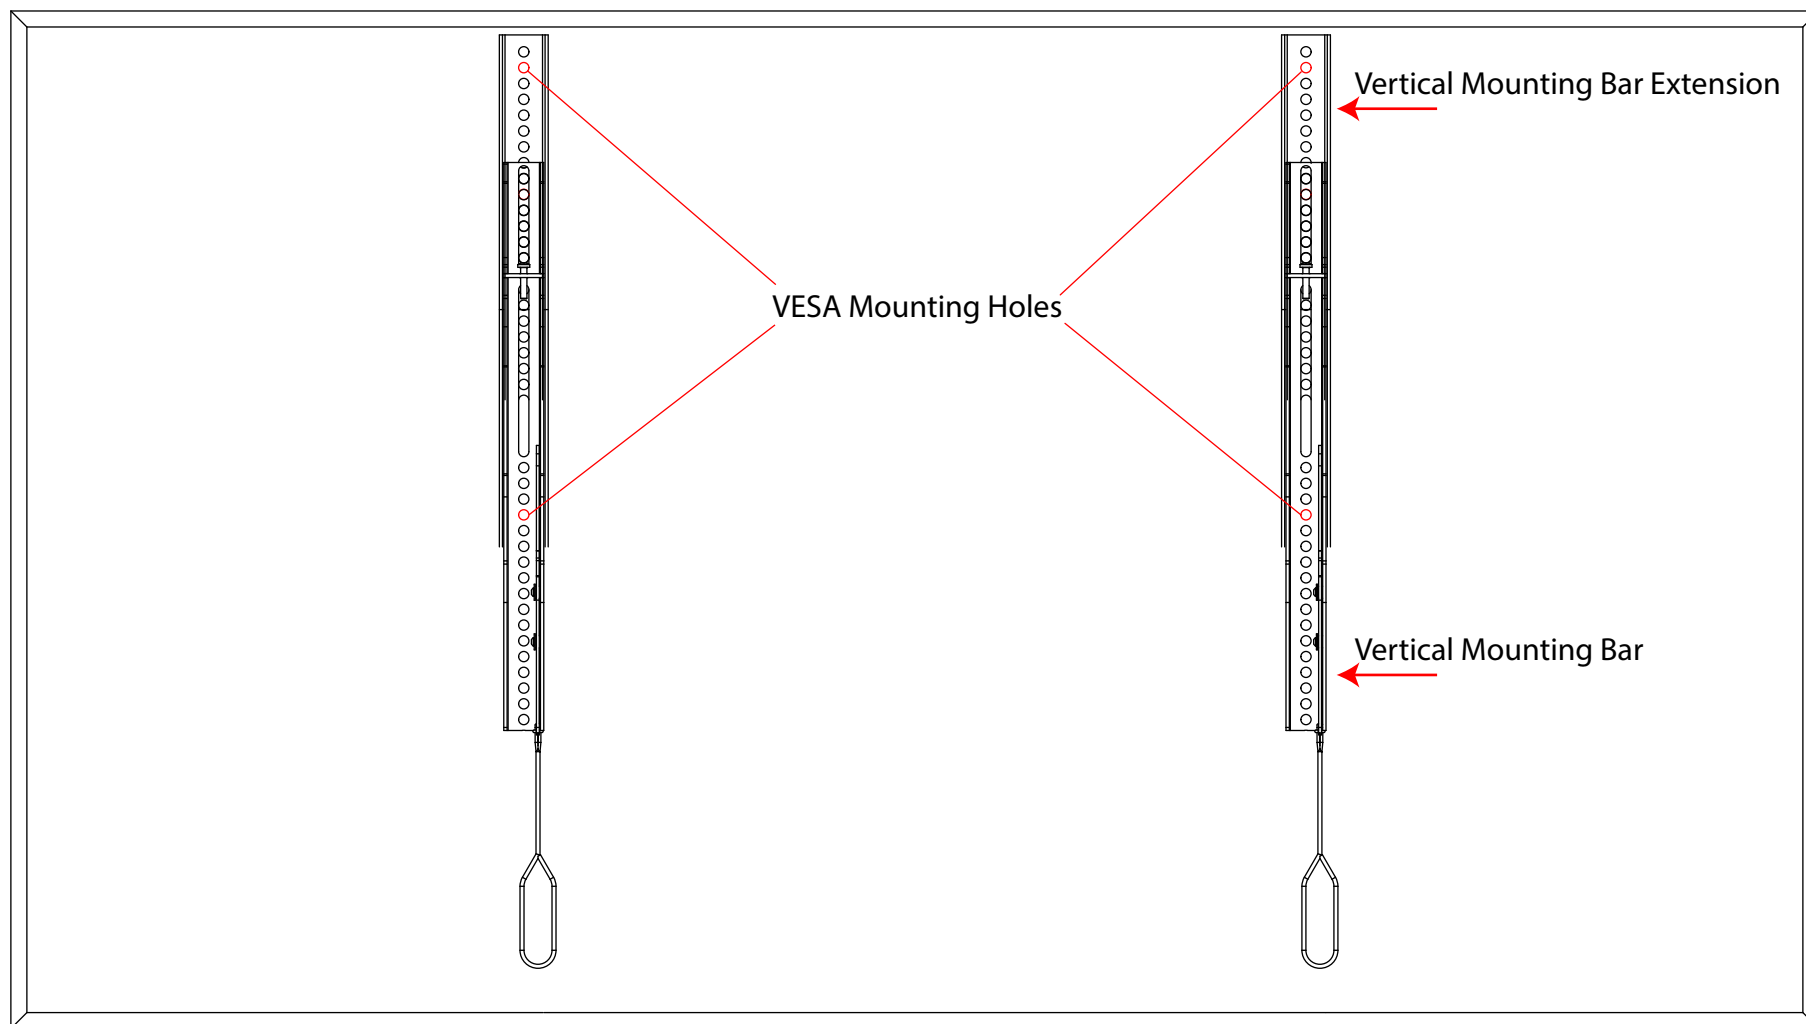

The Vertical Mounting Bar Extensions shown in the following images are the L-65 Vertical Mounting Bar Extensions. The following steps are the same for the L-65, L-77i, and L-85 Vertical Mounting Bar Extensions.

These steps are designed to be used in conjunction with the TV Mounting Instructions found within the Installation Manual for your Lift System.

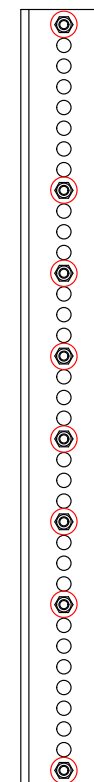

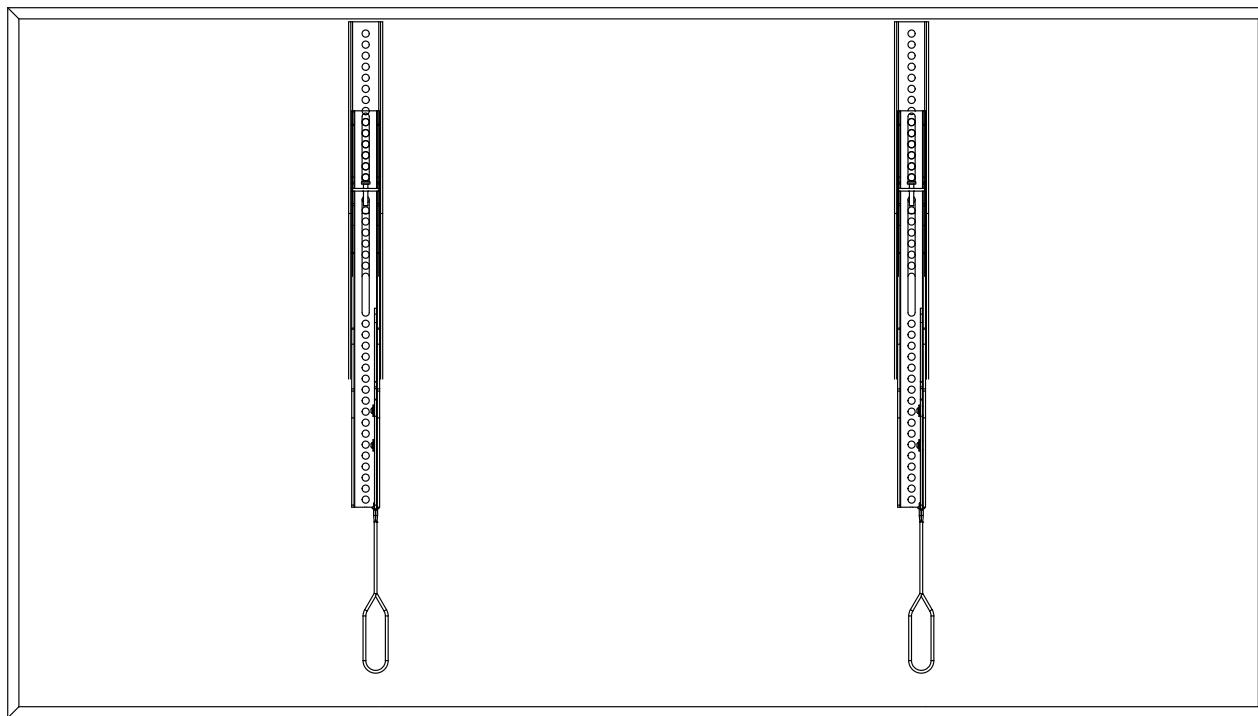

1. Slide each Vertical Mounting Bar Extension onto the front of each Vertical Mounting Bar.

Note: The Extensions can be used on the top or the bottom of the Vertical Mounting Bar depending on your TV's VESA Pattern.

2. Test fit the Vertical Mounting Bar Extensions with the Vertical Mounting Bars on the back of your TV.

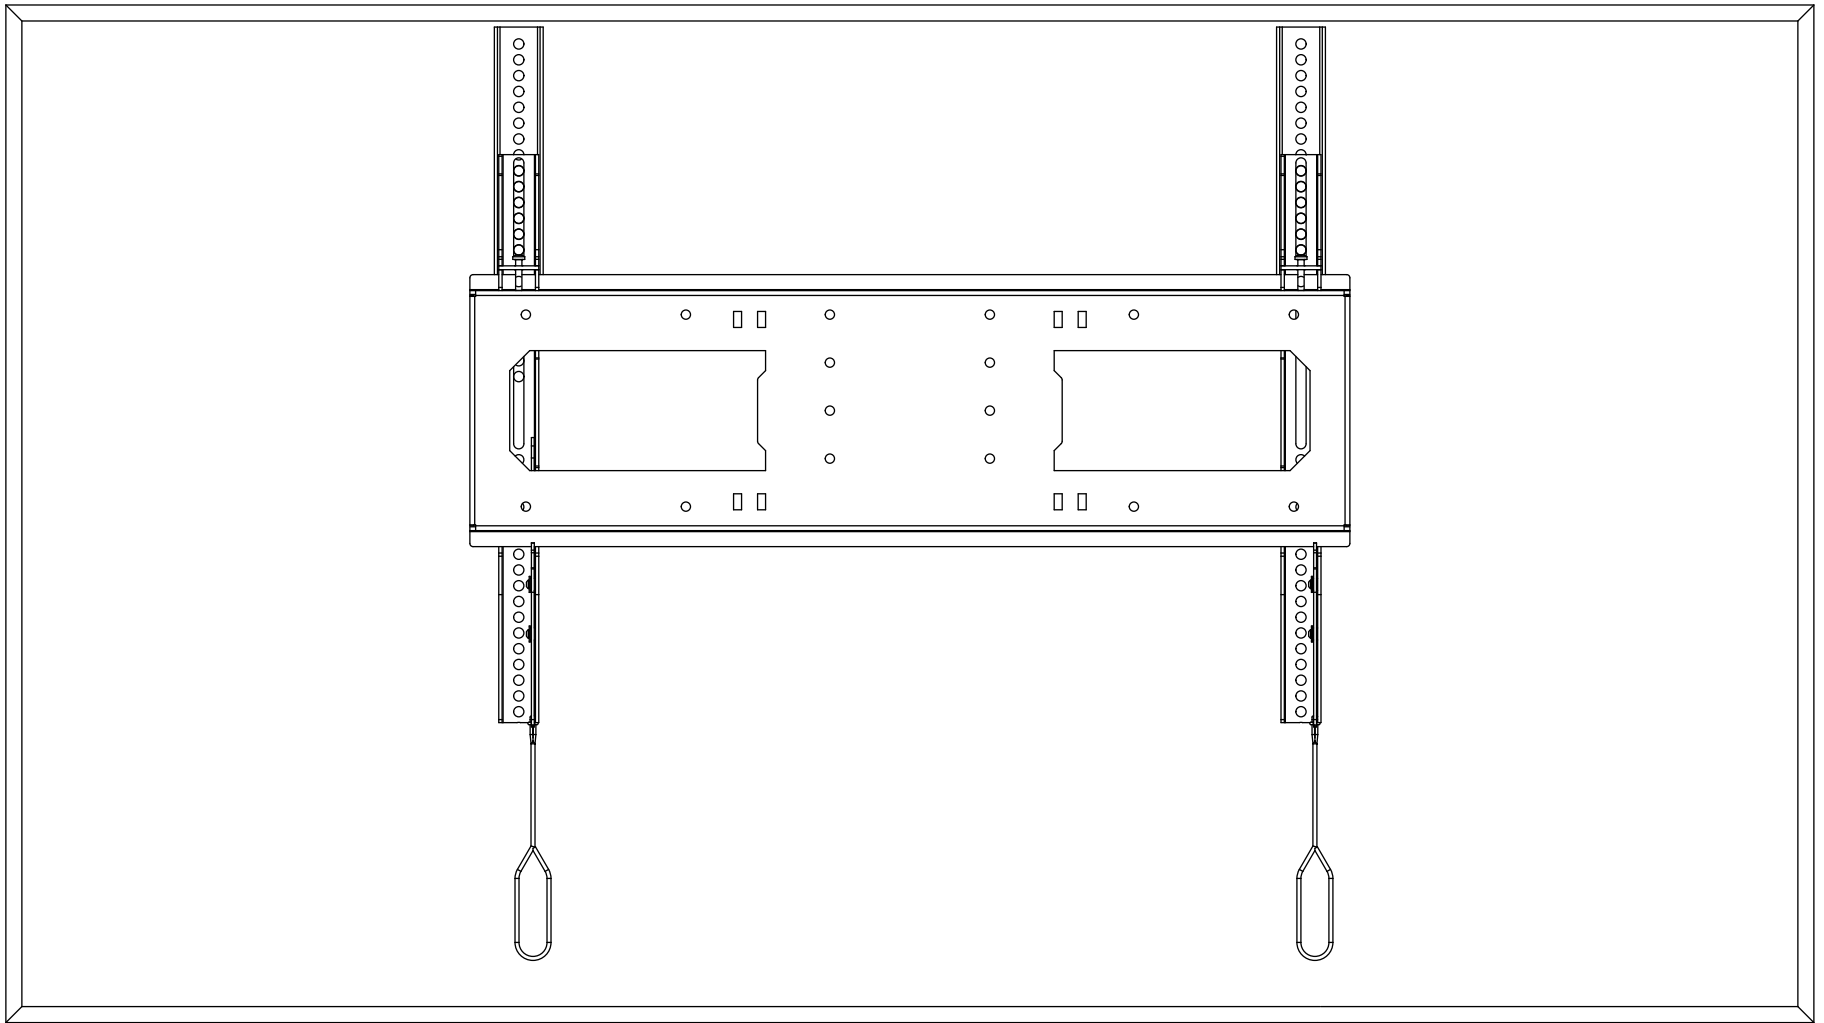

For L-85 series
Ensure two Pems are used

3. Attach the Vertical Mounting Bar Extensions and Vertical Mounting Bars to the back of your TV using the appropriate TV Mounting Hardware.

Note: One screw will always fasten through both of the Vertical Mounting Bar and the Vertical Mounting Bar Extension, while the other will fasten through the Vertical Mounting Bar only.

Note: For L-85 Series, ensure at least (2) M6 x 6 BHMS Screws secure each Vertical Mounting Bar Extension to the Vertical Mounting Bar.

4. Hang your Vertical Mounting Bars onto your Screen Backplate.
